Lead Editor: Jonathan Gennick

Technical Reviewer: Stephen Kaufman, David Stucki

Editorial Board: Steve Anglin, Ewan Buckingham, Gary Cornell, Jason Gilmore, Jonathan Gennick, Jonathan Hassell, James Huddleston, Chris Mills, Matthew Moodie, Dominic Shakeshaft, Jim Sumser, Keir Thomas, Matt Wade

Project Manager: Beth Christmas

Copy Edit Manager: Nicole Flores

Copy Editor: Ami Knox

Assistant Production Director: Kari Brooks-Copony

Senior Production Editor: Laura Cheu

Compositor: Linda Weidemann, Wolf Creek Press

Proofreader: April Eddy

Indexer: John Collin

Artist: Kinetic Publishing Services, LLC

Cover Designer: Kurt Krames

Manufacturing Director: Tom Debolski

Foreword	xv
About the Authors	xix
About the Technical Reviewers	xxi
Acknowledgments	xxiii
Introduction	xxv

PART 1 ■ ■ ■ **Readme.1st**

■ CHAPTER 1	BizTalk in the Enterprise	3
	What Is in the Toolkit	3
	Common Enterprise Usage	10
	New BizTalk Solution Checklist	10
	What Are the Teams' Current Core Skill Sets?	
	What Skill Sets Will the Team Need to Attain?	10
	What Are the Project Timelines? Will the Team Be Using	
	BizTalk Exclusively to Decrease Development Time?	12
	Is There Enough in the Budget to Implement BizTalk?	12
	How Many Servers Are Required to Implement a	
	BizTalk Solution?	16
	How Much Custom Code Are You and Your Team	
	Willing to Create? Would You Rather Use Completely	
	Out-of-the-Box Functionality?	18
	Is BizTalk Suited for the Application in Question?	18
	Will Every Transaction in the System Need Monitoring?	
	Will the Tracked Data Need Saving for Archiving Purposes? ...	19
■ CHAPTER 2	Starting a New BizTalk Project	21
	Starting Preliminary Design	23
	Creating Your Development Environment	28
	Isolated Development Configuration	28
	Using Virtual Machines	29
	Organizing Visual SourceSafe Source Control	30

Structuring and Integrating with Visual Studio	31
Single Visual Studio Solution	33
Multiple Visual Studio Solutions	34
Developer-Independent Solutions	36
Organizing Artifacts in BizTalk 2006	36
BizTalk Applications	37
Using BizTalk Explorer to Manage Applications	38
BizTalk's Administration Console	39
Creating a Build-and-Integration Environment	40
Five-Step Build Process	41
Using Test-Driven Development	45
Creating a BizTalk Installation Package	46
BizTalk Assembly Naming and Versioning	48
Side-by-Side Deployments	49
Side-by-Side Deployment Strategies	50
BizTalk Naming Conventions	57
BizTalk Artifact Namespaces	58

PART 2 ■ ■ ■ BizTalk Revealed

■ CHAPTER 3 Thinking Inside the Box	67
Understanding the Message Bus	68
The Messagebox	68
Messaging Components	69
Using XML Namespaces	76
Understanding Property Promotions	76
Using Port Filters and Content-Based Routing	79
Using System Property Schemas	86
Tracking and Message Management	91
Handling Failed Messages and Errors	92
The BizTalk Management Database	95

CHAPTER 4	Pipelining and Components	105
	Getting Started with Pipeline Development	107
	Pipeline Stages	107
	Understanding Pipeline Execution	109
	Understanding Interchanges	111
	Overview of Recoverable Interchange Handling	112
	Configuring Recoverable Interchanges	114
	Using the Default Pipelines	115
	Routing Binary Data	117
	Using BizTalk Framework 2.0 Reliable Messaging	118
	BizTalk Framework Assembler and Disassembler	
	Pipeline Components	119
	Working with BizTalk Framework Properties	
	Within Orchestrations	120
	Acknowledgement Verification	120
	Custom Components	121
	Component Categories	122
	Component Interfaces	123
	Key BizTalk API Objects	123
	Writing Your First Pipeline Component	128
	Creating More Complex Pipeline Components	128
	Dynamically Promoting Properties and Manipulating the	
	Message Context	129
	Schema Selection in VS .NET Designer	132
	Validating and Storing Properties in the Designer	135
	Custom Disassemblers	139
CHAPTER 5	Pipeline Component Best Practices and Examples	145
	Creating New Documents	145
	Using BizTalk Streams	147
	VirtualStream	148
	SeekableReadOnlyStream	148
	XPathReader	148
	Pipeline Component Examples	152
	Dealing with Extremely Large Messages	152
	Caveats and Gotchas	154
	Large Message Decoding Component (Receive Side)	155
	Large Message Encoding Component (Send Side)	161

Dealing with Compressed Files	166
Sending Simple Zipped Files	167
Sending Multiple Zipped Files	174
Receiving Zipped Files	174
Using PGP	179
PGP Encode Component	180
PGP Decode Component	186
The Databased Disassembler	192

CHAPTER 6 BizTalk Design Patterns and Practices	197
Implementing Dynamic Parallel Orchestrations	197
Broker Implementation Overview	199
Handling Ordered Delivery	204
Building a Resequencer	204
Building a Resequencing Aggregator	211
Solution 1: Status Quo—Messages Received As Independent Interchanges	212
Solution 2: Not So Status Quo—Messages Received As a Batch	213
Editing and Resubmitting Suspended Messages	214
Strategy for Edit and Resubmit	214
Pulling Data from the Suspended Queue	214
Canonical Format	215
Clients for Editing the Message	215
Additional Workflow	215
Moving Correct Data Back into BizTalk	215
Sample Flows for Edit and Resubmit	216
Pseudo-Walkthrough to Perform Edits and Resubmits	218
Managing Exceptions in Orchestrations	225
The Exception Management Challenge	228
BizTalk Server 2006 Failed Message Routing As a Blueprint	231
Failed Orchestration Routing API for BizTalk 2006	233
Running the EAIPProcess	240
Processing and Retrieving Messages and Exceptions from the Fault Message	243
Beyond the Next Horizon	249

CHAPTER 7	What the Maestro Needs to Know: Advanced Orchestration Concepts	251
	What an Orchestration Is	251
	What the Orchestration Engine Provides	252
	Do You Really Need an Orchestration?	254
	Know Your Instruments (Shapes)	256
	What Transactions Mean and Cost	261
	Atomic Transactions	261
	Long-Running Transactions	263
	Threading and Persistence	264
	Dehydration	264
	The Dehydration Algorithm and Thresholds	266
	The Cost of Parallel Shapes	267
	Correlation	270
	What Is Correlation?	270
	Convoys: Serial vs. Parallel	271
	Pitfalls of Orchestration Development	272
	Batch Processing and Legacy Systems	272
	Interactive Orchestration (The Request/Response Approach)	273
	Calling an Assembly or Sending a Message to a Web Service	273
	Error Handling and Suspended Instances	274
	Orchestration Engine Configuration	275
CHAPTER 8	Playing By the Rules? Use the Business Rule Engine	283
	What Is a Business Rule Engine?	283
	What Are Business Rules?	285
	When to Use the BRE?	286
	What Are the Artifacts That Constitute a Business Rule?	287
	Facts and Vocabularies	288
	Conditions	295
	Actions	295
	Rules and Priorities	297
	The Business Rule Composer	298
	Creating Vocabularies	299
	Creating Rules	301
	How Does the BRE Work?	301

Testing Business Rules	305
Going to Production	309
Executing Business Rules	312
Calling the Engine from Within an Orchestration	313
Referencing a .NET Class from a Policy That Is Being Called from an Orchestration	314
Returning a Value from the BRE to the Calling Orchestration	315
Calling the Engine from a .NET Application	316
Policy Chaining	318

PART 3 ■ ■ ■ You Mean You Aren't a Developer?

■ CHAPTER 9 BizTalk Server 2006 Operations	323
Configuration and Management	324
Administration Tools	324
Application Concept	327
BizTalk Server Administration Console	327
Scalability and High Availability	331
Scalability	332
High Availability	334
Maintaining the BizTalk Group	336
SQL Agent Job Configuration	338
Backup Procedures	343
Restore Procedures	353
Disaster Recovery	361
How Does BizTalk Log Shipping Work?	362
Configuring the Destination System for Log Shipping	364
BizTalk Group Disaster Recovery Procedures	368
BizTalk Runtime Server Disaster Recovery Procedures	369
Restore Procedures for BAS Site and Database	371
Restore Procedures for BAM	372
Restore Procedures for the Base EDI Adapter	372
Other Disaster Recovery Tasks	373
Related Non-BizTalk Application Disaster Recovery Procedures	375

CHAPTER 10	Deploying and Managing BizTalk Applications	377
	BizTalk Applications	377
	Important Deployment Artifacts	380
	Binding Files	380
	Processing Scripts	381
	Deploying a BizTalk Solution	384
	Steps in Deploying a BizTalk Application	384
	MSI Export/Import/Install	389
	Typical Deployment Cycle	398
	Administrative Tools	399
	BizTalk Administration Console	402
	BTSTask	404
	BTSDeploy	405
	WMI	405
	ExplorerOM	409
CHAPTER 11	To Tune or Not to Tune? Nobody Should Ask That Question	421
	What You Should Do First	421
	Gather Metrics on Expected Loads	421
	Prepare the Proper Environment and Gather Performance Metrics	422
	Where You Start	424
	What to Keep in Mind When Tuning	424
	What to Keep in Mind About Your Code	428
	How to Tune Each Subsystem	438
	ASP.NET, SOAP, and HTTP	438
	CLR Tuning	444
	File Tuning	445
	Latency	447
	Throttling	448
APPENDIX	Bibliography	457
INDEX		459
